FOCUS in EDUCATION GROUP

Multi-Tiered Systems of Support

Incorporating multi-tiered systems of support ensures that students **master the skills** needed to be their **best selves** and do their **best work**.

Utilizing multi-tiered systems of support (MTSS), In Focus curriculum is designed to be taught through Tier 1 instruction by classroom teachers and supported through Tier 2 and 3 interventions for students needing additional, targeted support.

The competencies associated with the In Focus well-being framework include physical, social, emotional, mental, and academic.
